

Performance Evaluation

Regression Metrics

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

How do we decide if those predictions are any good?

iHUB DivyaSampark, IIT Roorkee
and
Ritvij Bharat Private Limited

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

- Accuracy
- Recall.
- These sort of metrics aren't useful for regression problems, we need metrics designed for **continuous** values!

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

- Mean Absolute Error
- Mean Squared Error
- Root Mean Square Error

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Mean Absolute Error (MAE)

iHUB DivyaSampark, IIT Roorkee
and
Ritvij Bharat Private Limited

$$\frac{1}{n} \sum_{i=1}^n |y_i - \hat{y}_i|$$

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

MAE won't punish large errors however.

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Mean Squared Error (MSE)

- Issue with MSE:
 - Different units than y.
 - It reports units of y squared!

$$\frac{1}{n} \sum_{i=1}^n (y_i - \hat{y}_i)^2$$

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Root Mean Square Error (RMSE)

- root of the mean of the squared errors.
- Most popular (has same units as y)

$$\sqrt{\frac{1}{n} \sum_{i=1}^n (y_i - \hat{y}_i)^2}$$

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Compare your error metric to the average value of the label in your data set to try to get an intuition of its overall performance.

Domain knowledge also plays an important role here!

Led by : Shreyas Shukla

Context of importance is also necessary to consider.

We may create a model to predict how much medication to give, in which case small fluctuations in RMSE may actually be very significant.

Evaluating Residuals

Led by : Shreyas Shukla

Anscombe's quartet:

Clearly Linear Regression is not suitable

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

But how can we tell if we're dealing with more than one x feature?

INOB DivyaSampark, IIT Roorkee
and
Ritvij Bharat Private Limited

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Consider an appropriate data set:

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

The residual errors.

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

The residual errors should be random and close to a normal distribution.

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Residual plot shows residual error vs. true y value.
There should be no clear line or curve.

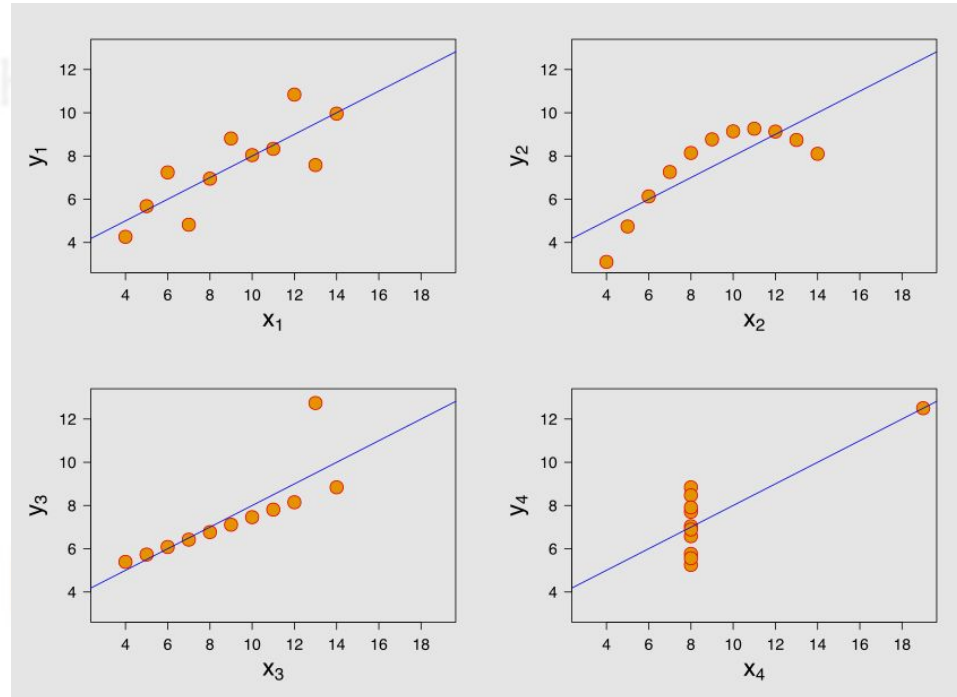

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Let's see 2nd one

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Residual plot showing a clear pattern, indicating Linear Regression no valid!

Especially the 3rd plot

(27th Aug 2024 - 18th Oct 2024)

Polynomial Regression

Theory and Motivation

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Two issues polynomial regression will address for us:

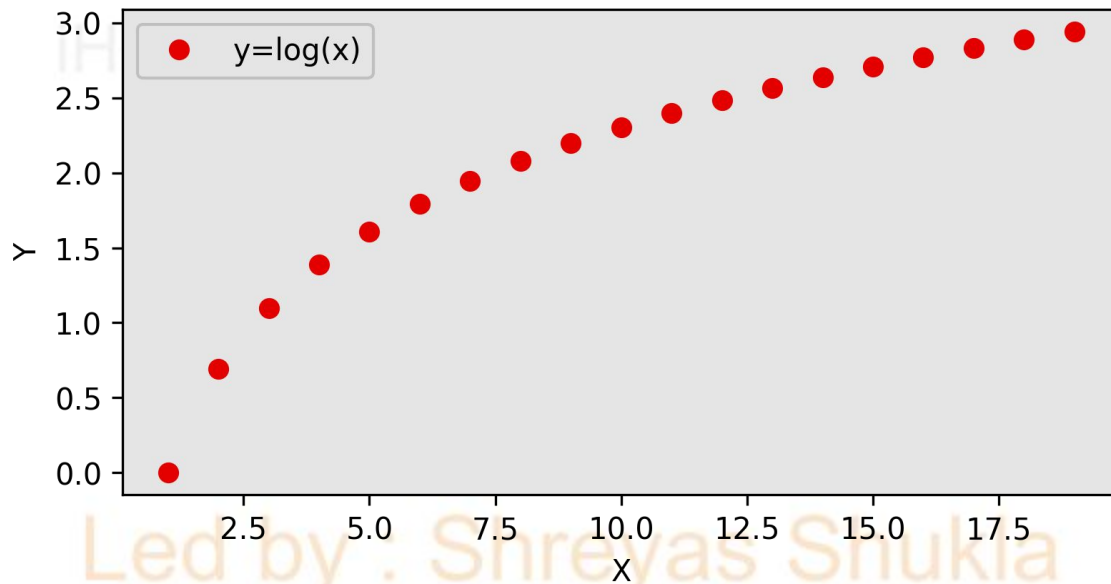

- Non-linear feature relationships to label
- Interaction terms between features

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Non- linear:

Caution: x inside $\log(x)$ is not feature

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Not a linear relationship

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

What about the square?

Seems moving to linearity

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Even more so for higher orders!

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

- **Interaction terms.**
- What if features are only significant when in sync with one another?
 - Perhaps newspaper advertising spend by itself is not effective, but greatly increases effectiveness if added to a TV advertising campaign. How to check?
 - create a new feature that multiplies two existing features together to create an interaction term

TV, Newspaper, and also $TV * Newspaper$

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

The features created include:

- **The bias (the value of 1.0)**
- **Values raised to a power for each degree (e.g. x^1 , x^2 , x^3 , ...)**
- **Interactions between all pairs of features (e.g. $x_1 * x_2$, $x_1 * x_3$, ...)**

Led by : Shreyas Shukla

Mastering Machine Learning with Python

(27th Aug 2024 - 18th Oct 2024)

Datasets **A** and **B**

- **$1, A, B, A^2, AB, B^2$**

Generalized terms of features **X_1** and **X_2**

- **$1, X_1, X_2, X_1^2, X_1X_2, X_2^2$**

Led by : Shreyas Shukla
